

INTRODUCTION

In the building and construction industry, drones or unmanned aerial vehicles (UAV) are used in different stages to capture real-time data or images of the project. Learn to operate a UAV safely and in compliance with regulations set out by the Civil Aviation Authority of Singapore (CAAS). As this is a beginners' class with theoretical and practical training, no prior flying experience is required.

COURSE OBJECTIVES

- Learn to operate a drone safely and professionally
- Gain the ability to fly drones while complying with Singapore's laws and regulations

REGISTRATION
