

INTRODUCTION

Discover through hands-on training how to use Autodesk Civil 3D®, a comprehensive design and documentation software for civil infrastructure. Our experienced trainer will empower civil engineers to create tomorrow's infrastructure. Learn to work with a model-based environment, streamline documentation, and harness the power of BIM for more effective design coordination and project collaboration.

COURSE OBJECTIVES

- Attain functional skills required to work in an intelligent, model-based design environment
- Learn to design better civil infrastructure in 3D
- Able to collaborate with ease with project teams

WHY YOU SHOULD CHOOSE CPPL

Construction Professionals Pte Ltd (CPPL) is Singapore's longest serving infrastructure and building construction professional organisation. We are committed to the highest standards for our people, our industry, and our communities.

As an Autodesk Authorised Training Centre (ATC), CPPL is cultivating the next generation of AEC professionals with the most advanced learning and development courses.

KEY COURSE INFORMATION

- 3-day training (9:30am-5:30pm)
- CPPL Training Centre at I North Coast
- As CPPL is an e2i-supported training provider, NTUC union members are eligible for UTAP training fund
- Course includes:
 - Understanding Civil 3D interface, tools, templates and settings
 - Civil 3D in action – e.g. project management, parcels, survey, corridors, pipe networks
 - Quantity and plan production

ASSESSMENT AND AWARD

Participants who meet the attendance requirement will be awarded the *Autodesk Certificate of Completion*.

WHO SHOULD ATTEND THIS COURSE

Recommended for BIM modellers, project coordinators, designers, engineers and project managers who need hands-on training.
