

Intermediate Drone Flying (Aerial Media) Masterclass

INTRODUCTION

Learn to use drones or unmanned aerial vehicles (UAV) to effectively create and deliver visual communications. This Intermediate course focuses on the use of UAVs for airborne imagery, also known as aerial photography/videography. You will acquire specialty skills such as storyboard planning, ability to apply different aerial photography and videography techniques in various terrains, and confidence in operating the UAV's smart features or intelligent flight modes. This course infuses theoretical learning with practical sessions.

COURSE OBJECTIVES

- Level up your understanding and application of drones
- Improve visual storytelling with confidence

WHY YOU SHOULD CHOOSE CPPL

Construction Professionals Pte Ltd (CPPL) is Singapore's longest serving infrastructure and building construction professional organisation. We are committed to the highest standards for our people, our industry, and our communities.

CPPL is cultivating the next generation of AEC professionals with the most advanced learning and development courses.

LEVEL

Basic (CPDFM001) **Intermediate** Advanced (CPDFM003)

KEY COURSE INFORMATION

- 0.5 day training
- Time and location to be communicated by trainer
- As CPPL is an e2i-supported training provider, NTUC union members are eligible for UTAP training fund
- Course includes:
 - Common aerial techniques
 - Applications in different terrains
 - Understanding of smart features
 - Aerial operations case study

ASSESSMENT AND AWARD

Participants who meet the attendance requirement will be awarded a *Certificate of Completion*.

WHO SHOULD ATTEND THIS COURSE

Recommended for project coordinators, engineers, project managers and individuals who would like to fly drones with confidence.
